Smart communications, **smart business**

Empower your employees with a complete communications solution

Increasing technological innovation of smartphones and tablets has led to the reinvention of the humble desk-phone. NEC's UNIVERGE Touchscreen desktop telephone (UT880) integrates the traditional desktop telephone features with the power of an Android tablet into a single device - providing you with an innovative, feature-packed phone that revolutionises your calling experience.

Smart, sleek and easy to use, the UT880 is designed to improve overall user experience, while remaining intuitive - without the need for extensive user training. Finally a desk phone that works just like the one in your pocket.

The promise of the Smart Enterprise!

Empowering the

Smart Enterprise

As you would expect, feature rich telephony is core to the UT880 with access to all the same phone features you would get from any top end NEC desk phone.

The UT880 allows you to integrate into your on-site Unified Communications solution be that either SV9100's UC Suite or the SV9300 / SV9500's UCE suite.

The preinstalled applications store (NEC Marketplace) allows you to explore and install applications from a curated and verified list of hundreds of applications designed to improve your user experience and provide you with real business benefits.

UT880 features

- > A full, seven-inch colour display with four-finger multi-touch capabilities.
- > A multi-line client that emulates a top of the line NEC telephone.
- > Integration with UC Suite on the SV9100 platform.
- > Integration with the UCE suite on the SV9300 and SV9500 platforms.
- > Integrated Bluetooth capability.
- > Built-in camera for video conferencing.
- > Access to a huge library of Android applications.
- > USB and SD storage expansion options.

The perfect desk phone

The NEC UT880 is designed from the ground up to deliver you the best telephony experience. With a high quality handset for natural sounding voice, a full duplex wideband speaker with an omnidirectional microphone for exceptional hands-free operation and Bluetooth or wired headset support for all day operation.

The UT880 is packed with all the telephony features you need. It delivers up to 32 lines for handling calls or accessing features and common numbers. It also provides one touch access to common features like hold, transfer, conference, directory and call logs, the UT880 delivers the experience you demand.

The phone is fitted with a flashing ring indication light so you know when you have a voice mail, an incoming call, or an alert from any installed applications. You can also customise the ring tones to stand out from the crowd.

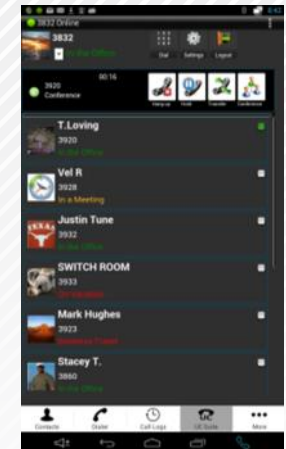

To make a call simply lift the handset. The phone dialler will pop to the front so you can handle your calls. Simply press the back button to get back to your application or press the home key to choose the application you wish to use.

More than just a phone

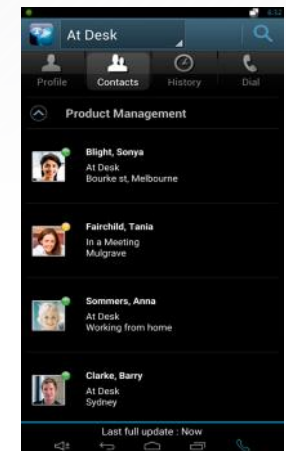

The UT880 also integrates into you Unified Communications solution of choice. For SV9100 users you can access the UC Suite directly from the phone application, for SV9300 & SV9500 users the Unified Communications for Enterprise (UCE) mobile client (MC550) can be installed.

You will get access to:

- > Your complete corporate and personal directories.
- > Real-time presence of contacts.
- > The ability to send and receive instant messages.
- > Click-to-dial.
- > Access Voicemail and Unified messages.

Stocks

Know how your favourite stocks are trending

News

Ensure you know what is going on around the world

Weather

Do you need an umbrella on the way home?

Games

Got 5 minutes to spare? Fancy a game of Candy Crush?

Access the latest applications

The UT880's core operating system is based on the world's most popular operating system Android. This allows you to access a massive range of applications from leading developers all around the world. Depending on your business needs there are a number of ways of getting your favourite application onto the UT880.

NEC Marketplace

Finding applications can be a daunting experience, so we have done the hard work for you. The UT880 is equipped with the NEC Marketplace, an application store curated and managed to offer you the best Android has to offer, with every application tested to ensure it confirms to the UT880's unique characteristics and provides you with a quality application experience.

Your very own app store

We know that your business is unique and a one size fits all attitude is never going to allow you to meet your business goals. To help your staff focus on getting their job done and not searching through app stores, NEC has developed the NEC Vault, an on premise applications store that you can deploy. It allows you to curate and manage your own list of applications that you feel will give your users the experience that they demand.

From its web based console, you control what applications are made available and your employees simple open up the Vault application to download the applications that they need directly on their phone.

Total device management

We know that security matters and depending on the size of your organisation and the types of devices you allow your staff to use, you might already have a Mobile Device Management (MDM) system.

You can use your existing MDM to control, monitor and configure the NEC UT880. Allowing your IT staff to manage the device the same way they manage their mobile fleet giving them control over which applications are installed, policy enforcement, root detection and even the option to remote wipe data.*

Via your Intranet

The UT880 will allow your users to load applications directly from your intranet. Load the Android applications into your SharePoint or other content management server and when users click on the application link it will be downloaded and installed.

** Your existing MDM must support Android devices to manage the UT880. Features offered are dependent on the MDM application chosen.*
